AUDITED 2026-08-07: all 18 community pages measured live | 1,218 total original words | 410 IDX listing cards | 0 FAQ schema | 0 data tables | blog dormant since July 2020 | competitor sites measured the same day

PRIORITY 0 · CRITICAL FIXES (BEFORE NEW CONTENT)

FIX 1

18 community pages average 68 original words each, 1,218 words across the whole footprint. Rebuild as Tier 2 guides.

FIX 2

IDX template serves 87 F.C. Tucker listing cards against 38 Compass on the team's own domain. Rebalance the template.

FIX 3

Zero FAQPage schema site-wide. Single highest-leverage AEO gap, and no competitor in the market has it either.

FIX 4

Blog holds one post since July 2020, titled "placeholder blog post title." Remove it and start the real cadence.

FIX 5

Zero data tables site-wide. Engines cite pages that carry original dated numbers, and there are none.

FIX 6

One H2 per community page. No heading structure for passage retrieval or answer extraction.

FIX 7

Production figures conflict: site says \$115M over two years and 1,200+ families, Compass says \$500M+ career and 1,500+.

FIX 8

The agent bio pages carry no Person schema and no sameAs graph. Named experts are what engines cite.

FIX 9

Williams Creek page pulls general 46240 inventory from \$229K to \$579K, not Williams Creek comparables. Tighten the IDX radius.

OPEN QUESTIONS · NEEDED TO UNBLOCK THE BUILD

The intake questionnaire was never returned. Everything above was assembled from the public record. These eight answers finalize it.

Q1 · Blocks the entity layer

Which production numbers publish everywhere? Engines cross-check, and the site and Compass profile currently disagree.

Q2 · Blocks nine author pages

Who owns which lane, who can be quoted, and who stays out of public content?

Q3 · Sets pillar weighting

Buyer or seller weighted, and which price bands lead the community guides?

Q4 · Sizes the differentiator

How much of the business is new construction, how direct can we be, and which builder relationships are off limits?

Q5 · Sequences 18 town guides

Which communities are primary, secondary or IDX only? Our working split is shown in Tier 2 above.

Q6 · Defines Tier 3

Which 20 to 25 subdivisions carry the most volume and the most of your business?

Q7 · In or out

Compass Concierge, bridge loans and Private Exclusives as content? We would cover cost and tradeoffs honestly.

Q8 · Blocks publishing entirely

Who controls WordPress, GA4, Search Console and the IDX template? Fix 2 needs whoever built the site.

PHASED ROLLOUT

Phase 1

Days 1–30 · Foundation

→ All 9 critical fixes

→ Entity layer: team page + 8 agent pages with full schema and sameAs graph

→ Communities pillar hub

→ Carmel and Zionsville rebuilds

→ LEAP pillar hub + "What LEAP means for home values"

→ Publish the July 2026 market report (already built)

Phase 2

Days 31–60 · Depth

→ New Construction pillar hub

→ "Should you bring your own agent to a builder's model home"

→ Schools pillar hub + Carmel Clay and Zionsville guides

→ Westfield, Fishers, Noblesville, Whitestown, Geist rebuilds

→ "Where to live if you work at LEAP"

→ Monthly market report

Phase 3

Days 61–90 · AI Search Offensive

→ Compare and Decide pillar hub

→ Carmel vs Zionsville, Carmel vs Westfield

→ Indiana SB1 property tax explainer

→ Relocation and Selling pillar hubs

→ "Moving to Carmel from Chicago"

→ 90-day review: rank, citations, leads, listings
